Life, enhanced.

OUR BRANDS
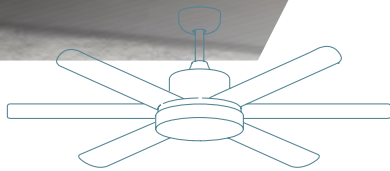

MARTEC®
Cooling

Martec® Cooling offer an extensive range of AC and DC ceiling fans, and accessories to suit a wide range of applications.

Martec® ceiling fans come in a wide selection of colours and sizes, as well as changeable colour temperature and 3 step dimming features for fans with LED lights. Our ceilings fans are highly energy efficient and quiet, and come with a summer/winter mode option.

Ceiling fan accessories that include lights, downrods, and remote controls with timer. We do have a solution to meet your needs and enhance your lifestyle.

MARTEC®
Heating

Martec® Heating offer an extensive range of bathroom heaters and accessories to suit any bathroom sizes and applications.

Martec® bathroom heaters come in a wide variety from a simple single heat lamp unit, to slimline designed 3-in-1 heaters. Our instant heat option configures from 1, 2 or 4 heat lamps to tricolour LED lights. Along with different IPX ratings and colour finishes enable our heaters to compliment any design scheme and environment at your home.
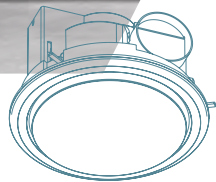

/// MARTEC®
Exhaust

Martec® Exhaust offer a range of exhaust fans to any bathroom sizes and other area applications.

Martec® exhaust fans feature different sizes, IPX rating, shape, and tricolour LED light option. Our exhaust fans are operated on a high performance ball bearing motor with superior blade design for maximum air extraction and quiet operations. Plus, always supplied with flex and plug made installation easier.
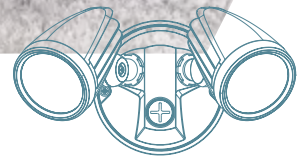

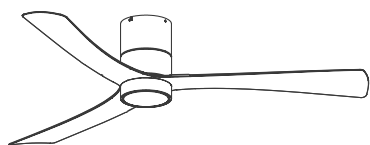

/// MARTEC®
Lighting

Martec® Lighting offer an extensive range of LED products from downlights, surface mounted fittings to exterior lighting.

Our downlights and surface mounted products are come with switchable colour temperature change and with dimming options, available using Martec® dimmers. Our exterior lighting come with different ingress protection ratings and built in motion sensor option provide security and safety in all outdoor applications.

Martec® Lighting can fulfil smaller and larger projects within your budget and needs.

DC CEILING FANS

· ·

ADVANTAGES OF DC MOTOR CEILING FANS

High Efficiency
DC motors on average consumes less energy than conventional ceiling fan motors.

Speed Control
DC motor control provides up to 5 or 6 speed settings and an easy to use reversing function for summer and winter operation.

Light Weight
DC motors weigh less than conventional fan motors, resulting in a lighter product that is easier to install for electricians.

Quiet Operation
DC motors are very quiet when in operation, ideal for bedrooms.

Remote Control:
DC ceiling fans can only be operated via a DC remote control (supplied).

AC CEILING FANS

. . . .

ADVANTAGES OF AC MOTOR CEILING FANS

Remote Control
AC motors ceiling fans gives you more remote control options from using remote control kit, wall controller or a simple switch.

Low Cost
AC ceiling fans are cost efficient and use less electricity when compared with most household appliances – in particular air conditioners – as a standard AC powered ceiling fan will use less than 100W on the highest speed with the majority of models using less.

More Choices
AC motors ceiling fans have been on the market for a while now. There are plenty of different options and styles for you to choose from and to suit all budgets.

. . . .

ELITE

Slimline Designed
1220mm (48") AC Ceiling Fan

CEILING FANS ACCESSORIES

ADVANTAGES OF ACCESSORIES

Remote Control
Remote control allows you to change the fan speed with a touch of a button via a remote or wall control panel.

Light
Ceiling fan lights are a perfect option allowing you to illuminate the room while providing a relaxing cool breeze.

Downrod
Extension rods provide convenience and better efficiency when the area has a high ceiling.

Lighting

DOWNLIGHTS

· ·

Downlights are a well known and flexible lighting option, they are versatile and easy to fit. The primary purpose of a downlight is to provide functional ambient light and to ensure a room is illuminated well.

Martec® offers a range of downlights with switchable wattage and colour temperatures to suit your application needs. Dimming options are available using Martec dimmers to create mood lighting.

· ·

DAYLIGHT APPLICATION

1
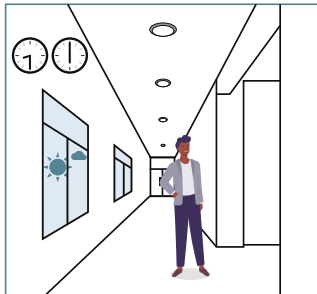

The light remains off when natural light level exceeds daylight threshold preset, even if motion is detected.

2
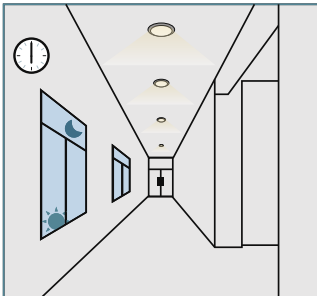

The light automatically turns on at a dim level when natural light lux level drops below preset daylight threshold, even if there is no motion detected.

3
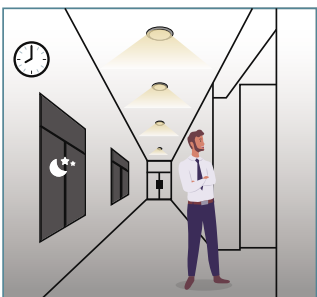

When there is motion detected the light switches on at brightness level.

4
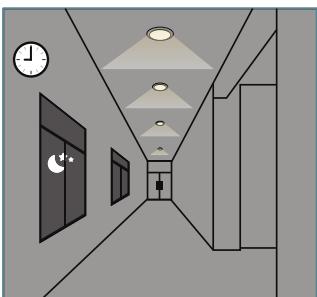

The light automatically turns on at a dim level again when there is no motion detected.

5

The light automatically turns off when the natural light exceeds daylight threshold preset, even with presence.

For more product information please visit our website.

DIM DOWN APPLICATION

(CORRIDOR FUNCTION)
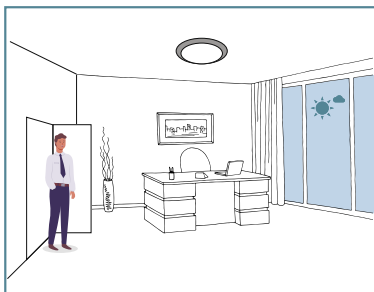

The light remains off during daytime even when movement is detected. (Ambient lux level is above preset daylight threshold).
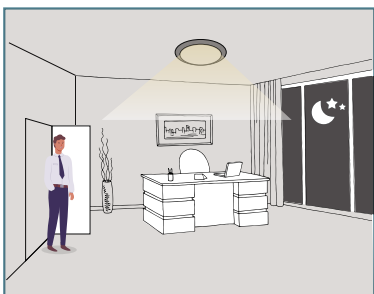

With movement and insufficient ambient lux level, the light is triggered on 100% by the detector.
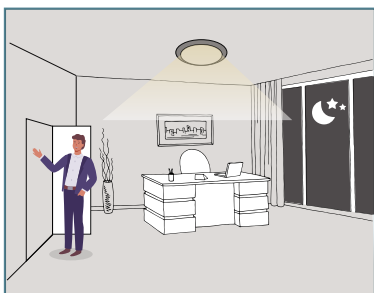

If there is no more movement, the light dims to stand-by dimming level after hold-time.
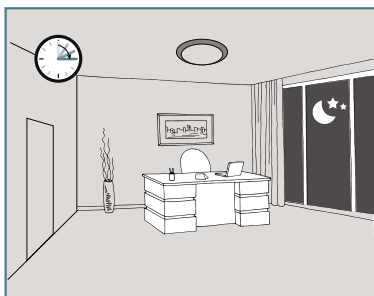

The light turns off automatically after stand-by time.

EXTERIOR LIGHTING - SECURITY LIGHT

Martec® offers a full range of security lights with features such as switchable colour temperature, different wattages and ingress protection ratings to suit any outdoor application. With built in PIR or Microwave Motion sensors, providing security and safety in all applications.

LEDUCATION

COLOUR TEMPERATURES

Tricolour

Colour temperature refers to the appearance of light provided by a light bulb. Different bulbs emit different colour temperatures. Colour temperature is expressed in Kelvin (K). The look and feel of a space can be greatly affected by colour temperature. Therefore, it is important to choose the right colour temperature based on the mood you want to create.

Based on the Kelvin numbered scale, the higher the colour temperature, the cooler, more energising light will be. A lower colour temperature will produce a warmer, more relaxing glow.

There are three basic choices of light bulbs in regard to colour temperature; 3000K (Warm White), 4000K (Cool White) and 5000K (Daylight)

For more product information please visit our website.

IC RATING

IC-Rated

IC stands for **Insulation Contact** and determines whether downlights can safely come into contact with potentially flammable material or with any covering that might interfere with the luminaire's cooling system.

IC4

- Suitable for residential or commercial use
- Fitting can be covered with building insulation
- Can be used where air transfer is not permitted or not desired between living space & roof space

....

IC

- Suitable for residential or commercial use
- Fitting can be loosely covered with building insulation
- Can be used where some air transfer is not permitted or desired between living space & roof

....
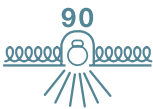

CA 90

- Suitable for residential or commercial use
- Fitting cannot be covered with building insulation
- Insulation can be placed against the sides of the fitting

....

DO NOT COVER

- Suitable for residential or commercial use in AU. Fitting cannot be covered with building insulation
- Insulation must be placed as per clearance distances according to manufactures installation guide

....

NON-IC

- Suitable for commercial use only
- Not suitable for use in residential dwellings or other places where insulation may be installed now or in the future
- Not tested for use with building insulation

IK RATING

IK stands for **Impact Protection**. It is a 1 to 10 system with a higher number indication a more robust product able to withstand a greater impact. IK10 can withstand a 4 litre tin of paint dropped on it from just under half a meter.

IK00
Non-protected
No Protection

IK06
Protected against
1 joules impact
Equivalent to impact of 0.25kg mass dropped from 400mm above impacted surface

IK01
Protected against
0.14 joules impact
Equivalent to impact of 0.25kg mass dropped from 56mm above impacted surface

IK07
Protected against
2 joules impact
Equivalent to impact of 0.5kg mass dropped from 400mm above impacted surface

IK02
Protected against
0.2 joules impact
Equivalent to impact of 0.25kg mass dropped from 80mm above impacted surface

IK08
Protected against
5 joules impact
Equivalent to impact of 1.7kg mass dropped from 300mm above impacted surface

IK03
Protected against
0.35 joules impact
Equivalent to impact of 0.25kg mass dropped from 140mm above impacted surface

IK09
Protected against
10 joules impact
Equivalent to impact of 5kg mass dropped from 200mm above impacted surface

IK04
Protected against
0.5 joules impact
Equivalent to impact of 0.25kg mass dropped from 200mm above impacted surface

IK10
Protected against
20 joules impact
Equivalent to impact of 5kg mass dropped from 400mm above impacted surface

IK05
Protected against
0.7 joules impact
Equivalent to impact of 0.25kg mass dropped from 280mm above impacted surface

For more product information please visit our website.

IP RATING

IP stands for **Ingress Protection**. It is a way of rating how well protected the device is from things that can get into it. The first number rating solid objects and dust from 1 to 6. The second figure is the water protection rating. The range is from 1 for slow dripping water from above up to 8 for a device that can be submerged.

IP 20
Ingress Protection

SOLIDS

1 Protected against a solid object greater than 50mm such as a hand.

2 Protected against a solid object greater than 12.5mm such as a finger.

3 Protected against a solid object greater than 2.5mm such as a screwdriver.

4 Protected against a solid object greater than 1mm such as a wire.

5 Dust protected. Limited ingress of dust permitted. Will not interfere with operation of the equipment.
2 to 8 hours.

6 Dust Tight. No ingress of dust.
2 to 8 hours.

WATER

1 Protected against vertically falling drops of water. Limited ingress permitted.

2 Protected against vertically falling drops of water with enclosure titled up to 15 degrees from the vertical. Limited ingress permitted.

3 Protected against sprays of water up to 60 degrees from the vertical. Limited ingress permitted for 3 minutes.

4 Protected against water splashes from all directions. Limited ingress permitted.

5 Protected against jets of water. Limited ingress permitted.

6 Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities.

7 Protected against vertically falling drops of water. Protection against the effects of immersion in water between 15cm and 1m for 30 minutes

8 Protection against the effects of immersion in water under pressure for long periods.

IPX RATING

IPX stands for **Ingress Protection**. The "X" simply means that the value for that number is missing. Therefore, the product has no protection against solids like dust and dirt.

IPX
8

IPX
Rating

WATER

0   No protection.

1   Protected against condensation or dripping water falling vertically.

2   Protected against spraying water when tilted up to 15 degrees vertically.

3   Protected against spraying water when tilted up to 60 degrees vertically.

4   Protected against splashing water from any angle.

5   Protected against low pressure water stream from any angle.

6   Protected against high pressure water stream from any angle.

7   Protected against water immersion. Immersion for 30 minutes at a depth of up to 1 meter.

8   Protected against continual water submersion in under water conditions.
